Chronicle SOFTWARE

NEWSLETTER

Welcome to our quarterly Chronicle Software newsletter!

We're excited to share with you the latest key updates from the Chronicle team:

1. **WEBINAR**: US-friendly timezone covering key market trends and Chronicle's product roadmap
2. **JAVA 21:** Announcing Chronicle Version 25 update that will support Java 21
3. **ARTICLES:** Building fast microservices with Java, and Memory Management in Java.

October 10th: Chronicle Product Roadmap Webinar

Chronicle's Product Roadmap Webinar last week was filled with discussions addressing the shortage of skilled developers, greater use of cloud and our latest product updates.

If you didn't get a chance to attend it, we have another **webinar tomorrow**, in a US-friendly timezone!

Date: October 10th

Time: 10:00 - 11:00 (EDT, New York)

Java 21 Compatibility | Version Update

With the LTS release of Java 21, we are excited to announce that our upcoming Chronicle Version 25 update by October 25th will support Java 21.

For further details on our stage release dates, and which Java versions are compatible with each version, see the following page:
