 - FIX Orchestra: Orchestrating Efficiency

Abbey Cross | Chronicle Case Study

The AbbeyCross ABX Platform improves connectivity and access to global FX payments partnerships for global banks, MSBs and payment providers. Chronicle continues to work closely with [AbbeyCross](#) to provide specialist advisory services, dedicated software development resources and proprietary, award-winning technologies to the ABX Platform. [Read here.](#)

“

“From the outset, Chronicle has proved to be a great fit for AbbeyCross, enabling us to very quickly reap the benefits of its **trusted reputation and undoubted expertise**. We have been especially impressed with the responsiveness, flexibility and agility of their service delivery.”

Ben McDonnell
CTO, AbbeyCross

Latest Company Updates

Chronicle at AWS Conference in NYC & London

Peter Lawrey & Ryan

Andrews both attended the Modernising the Trade Lifecycle with AWS event! This was an incredible opportunity to dive deep into the latest innovations transforming the trade lifecycle, powered by AWS. 🚀

Ryan joined other industry leaders on the panel for "Understanding the Crypto Lifecycle with Fireblocks, Lukka, and Chronicle" and discussed how AWS partners solve for challenges around the digital asset trade lifecycle.

Product decommission and versioning information

Product	EoL Date	Last version	Replaced by	Internal Notes
Map Enterprise	31st December 2024	2.25ea1	New rewritten Map Enterprise	Chronicle Map Enterprise version 2.25ea1 or lower now at end of life. Migration path is a later version to Map Enterprise offered as a module of Chronicle Queue Enterprise.
Engine / Datagrid	31st December 2024	2.17.21	Bespoke Services consultancy.	6th January 2020, Engine was renamed to Datagrid. Datagrid is now EoL. There is no direct replacement but is replaced with bespoke solutions using Chronicle Services.
Network	31st December 2024	2.24ea15	Closed source version	Chronicle Network was moved from open source to closed source in August 2023. Chronicle Network is now only available under license.

Java version support

Java 8	End of Support	From the early access release of x.29 in October 2025, Chronicle will begin dropping Java 8 support. Support for Java 8 in the x.28 stable release series will continue until October 2026 at which time all Java 8 support will end.
---------------	-----------------------	---

Chronicle version schedule

Release	First released	Stable release	EoL	Java versions
x.25	2023/10	2024/05	2025/06	8, 11, 17, 21

For a full list of releases, please use: [Version Support Matrix](#)

You can sign up to obtain regular release notes updates here: [Release Notes \(chronicle.software\)](#)

All versions prior to x.25 will be EoL from 31st December 2024. Please contact your Chronicle Account Management or account-management@chronicle.software for further details or to discuss.

Product Update:

We'd like to inform you that the *chronicle-enterprise-all* JAR has been discontinued. To provide more efficient and tailored access to specific components, we now offer more tightly scoped JARs that will better align with your use case and streamline dependencies.

If you are currently using *chronicle-enterprise-all*, please contact support@chronicle.software to discuss your upgrade path and identify the most suitable alternative for your setup..

Decoding Low Latency Trading Challenges

Peter Lawrey, CEO and Founder of Chronicle Software discusses the complexities and solutions of low latency trading. Peter shares his experiences from working with top investment banks, his transition to consulting, and the evolution of his company. [Listen here.](#)
